**MOST OF THE
SCANBODIES ARE AVAILABLE!**

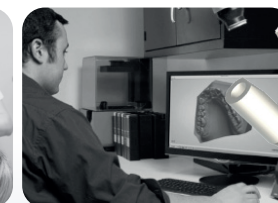

How to use the Integrated Library effectively?

1

Use any Intraoral or Model scanbody you have

Dentist

Dental Technician

2

Unlock full-service capabilities with our advanced integrated library!

Download updated ARUM integrated library for your CAD software

You can request the libraries through the Arum Dental download page.

800+ Implant Connections

exocad

3shape

3

Select the correct library code for the corresponding implant and type according to the guidance file for the library

(1) Implant system and size

NOBEL BIOCARE® Active™

Shop at www.arumdentalshop.com

You can now use our **FULL SERVICE** and save your cost!

(1) Print the model using ARUM Digital Analog

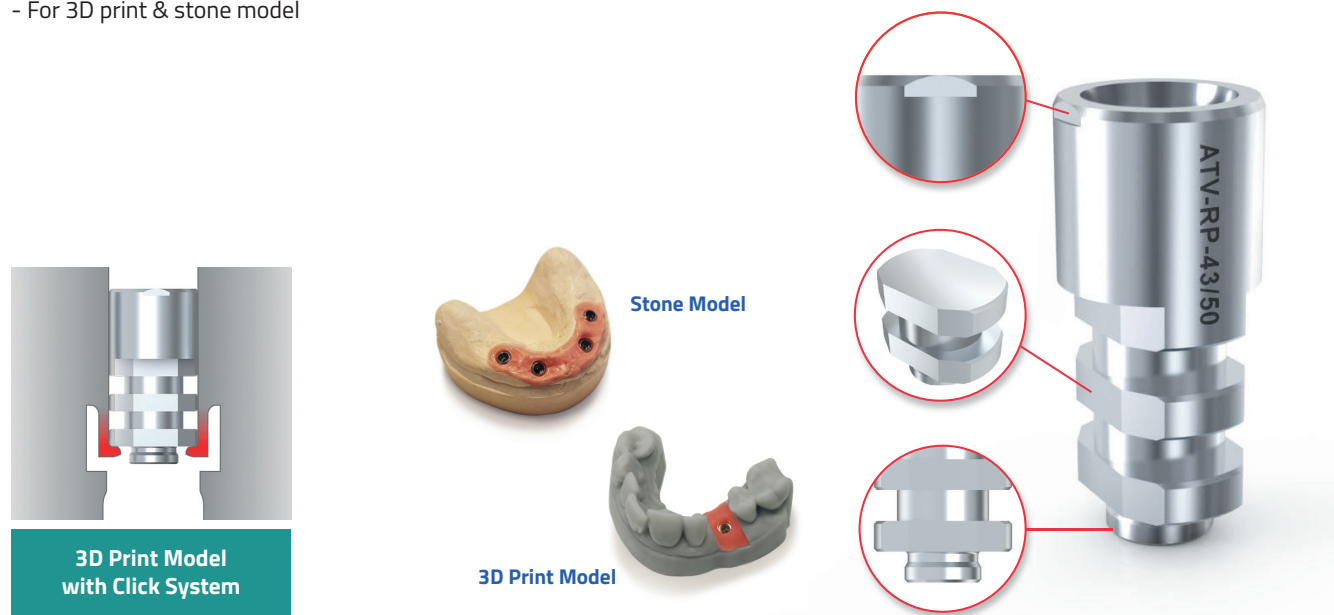

(2) Use ARUM Angled Ti-base with 2 clinical screws included (Angled / Straight)

Digital Analog *Integration Solutions!*

Maximise full use of ARUM Digital Analog, regardless of the intraoral / model scanbodies being used

- Raw Material Stainless Steel 303F
- Industry's largest implant system compatibility
- Precision machined up to $\pm 5\mu\text{m}$
- For 3D print & stone model

CE

**SAVE 77% ON COST FOR A
SINGLE-USE MODEL!**

OTHER BRANDS

Limited Library available

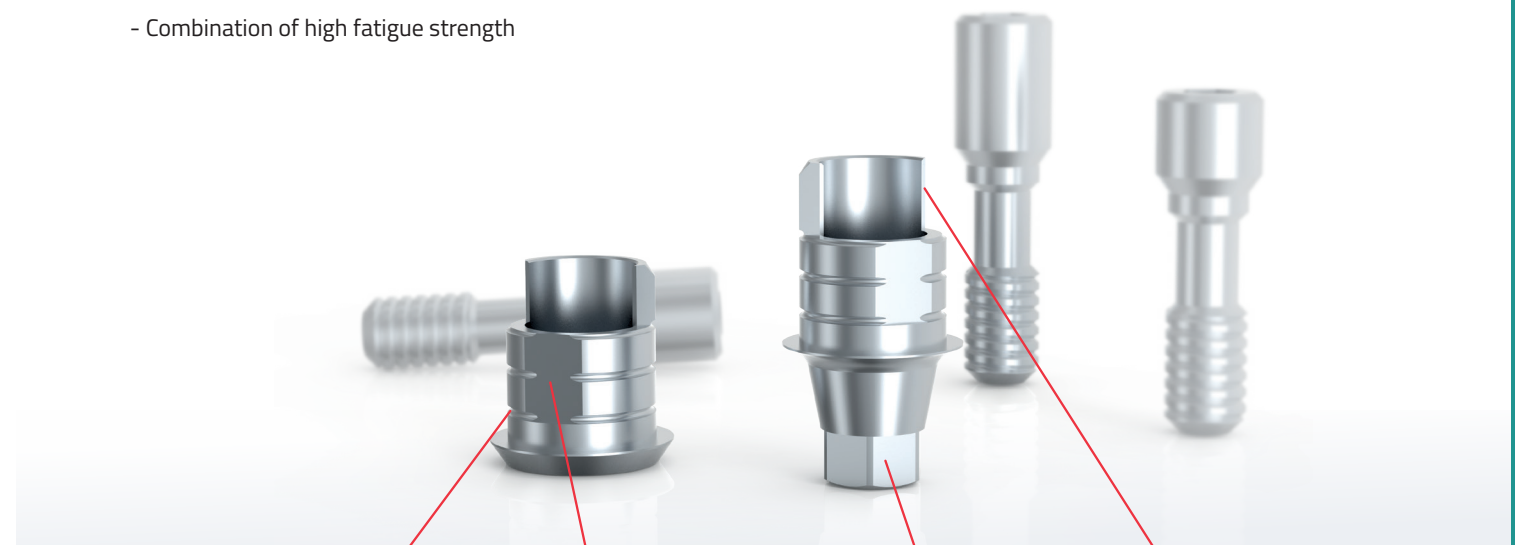

ARUM

**Over 500+ Library
available!**

Angled Ti-Base *Integration Solutions!*

Maximise full use of ARUM Angled Ti-Base, regardless of the intraoral / model scanbodies being used

- Raw Material Ti 6Al-4V ELI (ASTM F 136) Supplied by Germany
- Industry's largest implant system compatibility
- Superior level of biocompatibility
- Combination of high fatigue strength

Exterior retentions for more
cementation bonding

The cut side surface and hex
part surface in the image are
same direction

Precision machined
up to $\pm 5\mu\text{m}$

Prevention of
zirconia rotation

**2 Clinical Screws
Included**

Straight Screw
Same as the original
screw design

Angled Screw

Pre-milled Blank

- Raw Material Ti 6Al-4V ELI (ASTM F 136) Supplied by Germany
- Industry's largest implant system compatibility
- Securement of quality through full-scale inspection
- Precision machined up to $\pm 5\mu\text{m}$
- Diameter 10mm, 14mm

2 Clinical Screws Included

- Same as the original screw design

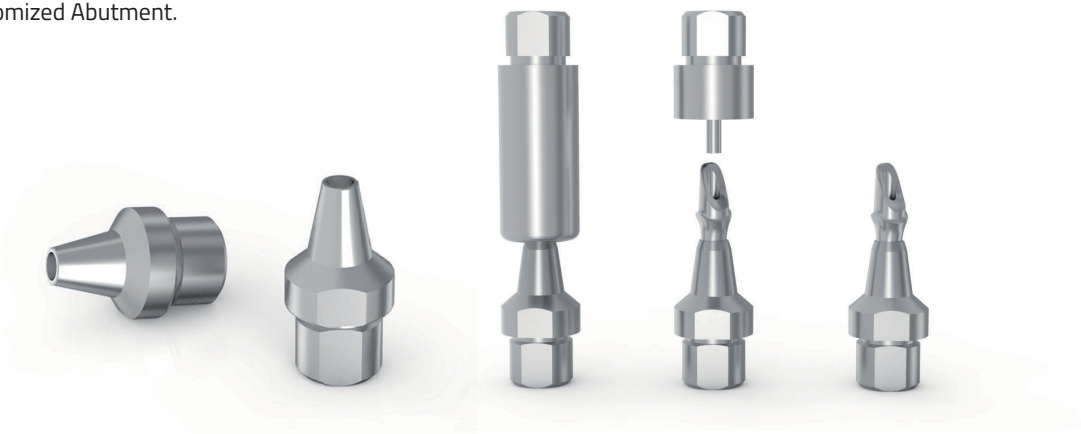

Diameter 10mm, 14mm

We provide diameter of 10 and 14 mm for you to make Customized Abutments appropriate for various conditions of teeth. As they are compatible with more than 500 implant systems, you can machine using ARUM equipment

Attachment

With use of Attachment, you can machine more sophisticated and near-perfect Customized Abutment.

Model / Intraoral Scanbody

- Raw Material Stainless Steel 303F
- Supports with the industry's largest number of implant systems and libraries

Free Library setup by remote support

HOIL technical support team will securely setup the library files into your PC through a remote connection to start your design right away.

800+ Implant Connections

High Accuracy

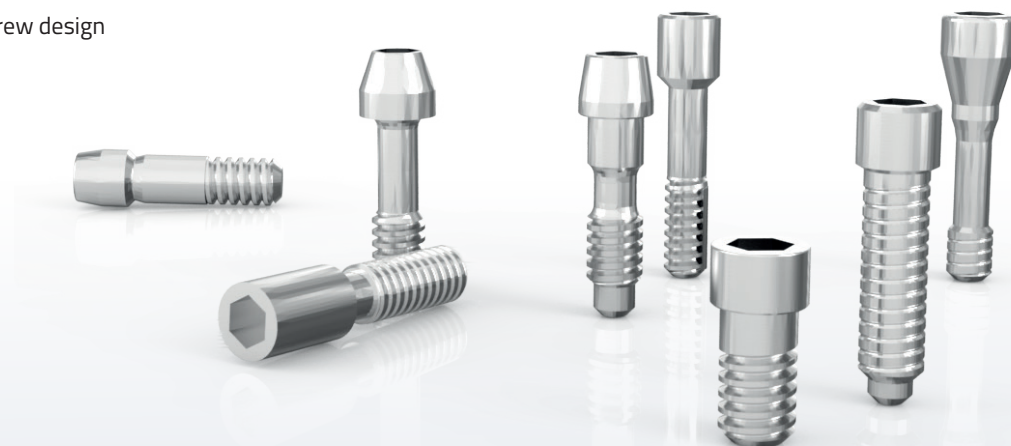

Model

Intraoral

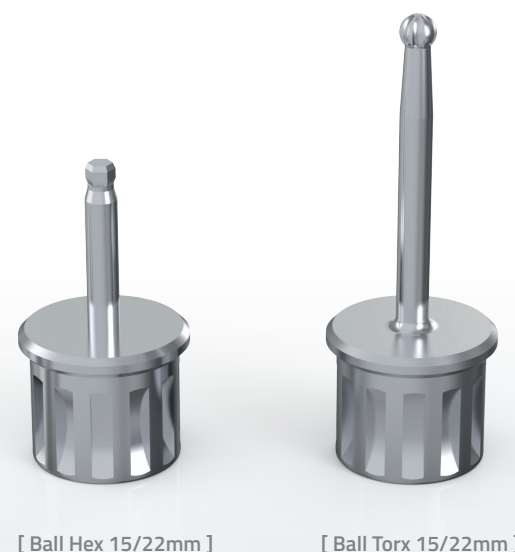

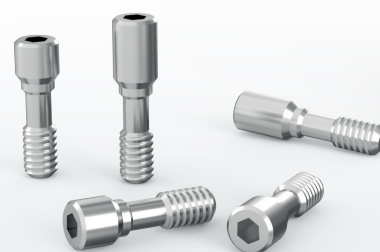

Screw

- Raw Material Ti 6Al-4V ELI (ASTM F 136) Supplied by Germany
- All hand inspection of thread
- Industry's largest implant system compatibility
- Precision and intensity of illumination
- Implement inspection with 150% value of original torque
- Same as the original screw design

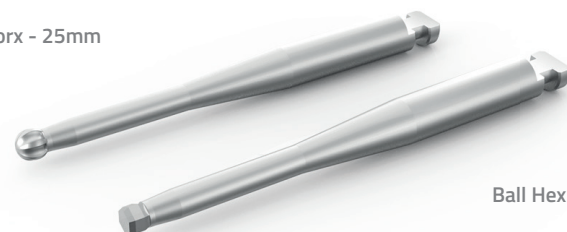

Clinical Driver

- Use of Trimrite with excellent corrosion resistance
- Easy and simple cleaning
- For angled screw channels
- Heat treatment and hardness of 50 or more
- Compatible with Straumann® Ratchet Wrench

Clinical Screw Driver tip (Machining type)

Ball Torx - 25mm

Ball Hex - 25mm

iPen Lab Driver

850+ Implant Systems Available!

Screw Driver Tips

- Place the model scanbody and the abutment
- 10 types of tips (compatible with the various implant systems)

Analog Insertion Tips

- Place the lab analog to 3D printed model
- Easy and safe to place the lab analog
- Prevent damage of the lab analog internal thread
- 5 types of tips (compatible with the various implant systems)

Screw Driver Tips
